MARIANNA MIRAKYAN

AI FILMMAKER | VISUAL STORYTELLER | CREATIVE PRODUCER

END-TO-END AI FILM PRODUCTION · NARRATIVE · EPISODIC · BRANDED CONTENT

PROFESSIONAL PROFILE

AI filmmaker and creative producer specializing in full-cycle AI-powered production - from the first idea to final delivery. Develops concepts, writes and adapts scripts, structures stories into scenes and episodes, researches references, builds visual worlds, creates character and location systems, plans shots and continuity, produces AI imagery and video, and completes editing and sound. Combines a fashion-design background with cinematic storytelling and a distinctive visual approach shaped through extensive Midjourney work.

END-TO-END AI FILMMAKING

- Story & Development - Concept development, screenwriting, script adaptation, story structure, episodic structure, scene breakdowns, dialogue, creative briefs and narrative research.
- Visual Research & Pre-Production - Reference research, moodboards, visual treatments, character sheets, location and environment development, wardrobe/styling direction, props, shot lists, storyboards and continuity planning.
- AI Production - Reference-based image and video workflows, character/environment consistency, prompt development, image-to-video, camera and motion direction, performance refinement and rapid iteration.
- Post-Production - Scene assembly, editing, pacing, dialogue and voice integration, sound design, music integration, image finishing, enhancement and final delivery.

CREATIVE & COMMERCIAL EXPERIENCE

Experienced in developing narrative films, episodic content, fashion/editorial visuals and branded short-form projects. Can translate a client brief, product or initial idea into a complete creative direction: research the market and references, develop the concept and treatment, define the visual language, produce the assets and deliver a polished final video. Comfortable working independently across multiple production stages.

VISUAL DIRECTION & MIDJOURNEY

Strong visual-development focus in Midjourney, with a self-developed approach to cinematic fashion, character and culturally inspired imagery. Uses composition, styling, lighting, texture, color, reference research and detailed prompt development to build cohesive visual worlds - then translates those worlds into motion while preserving identity and atmosphere.

TEACHING & AI WORKFLOW TRAINING

Develops and teaches practical generative-AI training for creators, covering image generation, visual development, prompt workflows and AI-assisted content production. Experienced in explaining complex tools clearly, structuring hands-on learning programs and guiding students from concept and references to finished visual work.

PRODUCTION STRENGTHS

Full-cycle independent production · Fast, organized workflow · Rapid iteration · Strong visual judgment · Character and environment continuity · Research-driven creative development · Cinematic composition and camera planning · Deadline-focused delivery
